**Students who will Safeguard Sensitive
Information in the U.S.**

Notre Dame College has been collaborating with corporate and state technology and security agencies to develop a new **online and on-site Bachelor of Arts degree in cybersecurity**, and is enrolling students now for fall 2020.

“Cybersecurity is an incredibly rigorous and lucrative career in the United States. Bachelor’s degree graduates earn close to six-figure salaries upon completion,” said Florentine Hoelker, Ph.D., Dean of the Finn Center for Adult, Online and Graduate programs at the College. “In the wake of the pandemic, cyberattacks and cyber scams have been increasing. **The need for professionals in the field is even greater in our country now than before.**” [Recommend a student for the program or consider a career change yourself!](#)
