**COCKTAIL RECEPTION
MAIN FOYER**

Class Listings

RARE BOOK COLLECTING

MCHUGH ROOM

Ken Palko

Associate Professor and Chair of Arts & Humanities

Ken will be speaking about the world of rare book collecting and sharing three rare books with the audience. Not only are the books rare in themselves, but each contains a bibliophilic mystery that has yet to be solved. "No college has a major in "rare books," but I maintain that the best preparation into the field of rare books is a strong liberal arts education... just like the one our NDC alumni received."

THE PROMISE OF THE WEBB SPACE TELESCOPE

**DEAN'S CONFERENCE ROOM
ADMIN BLDG, 1ST FLOOR**

Dr. John Smetanka

Provost & Dean of Faculty

What can be Learned from the First Starlight in the Universe? We are days away from the first scientific images after the successful launch and deployment of the James Webb Space Telescope. This most complex (and most expensive) space-based astronomical instrument promises to push back the limits of knowledge and expand understanding of the universe. This program aims to wet your appetite for the upcoming discoveries exploring what can be learned and why a generation of astronomers have been waiting decades for this opportunity.

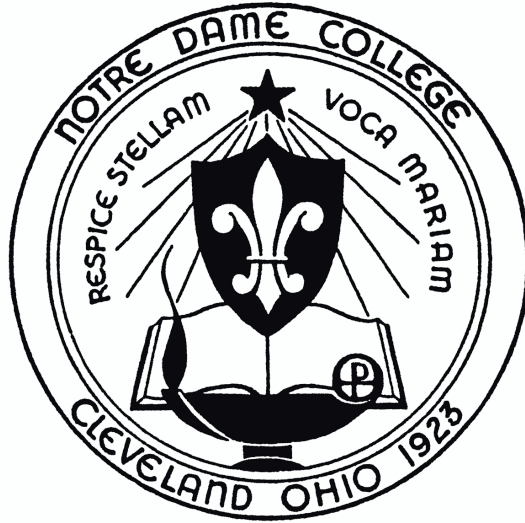

A TRIP DOWN MEMORY LANE

ADMIN BLDG, ROOM 453

Roz Scheer McLeod

Associate Professor of Health Science & Psychology

Roz has been teaching at Notre Dame College for 55 years. She is happy to sit with alumni in her office to reminisce, update, and share insights about their Notre Dame College experiences. This will also be a good time to ask questions or express concerns.

Welcome Home

Alma Mater

Sons and daughters of Our Lady
'Neath your banner, Notre Dame,
We will pledge devout allegiance
To the college of your name.
We will strive for what you stand for,
We will prove our filial love,
ALMA MATER hear our voices,
Which we raise to you above,
ALMA MATER, hear our voices,
Which we raise to you above!
